SCHEDA TECNICA / TECHNICAL SHEET

FREEDOM X

Transmettitore audio smart

MP3 PLAYER USB

Next-generation audio can be transmitted to an infinite number of FRDX series speakers (in-wall or in-ceiling). Able to operate on 4 different channels, it has a USB socket and a bluetooth receiver for managing Mp3 songs.
By connecting it to the home wifi or to a LAN socket, it becomes reachable from the LEGACY PLAYER application for Android and IOS that can be downloaded for free, thanks to which it will be possible to send the transmitter both the audio of your apps and create playlists that can also be selected directly from the transmitter.
By using multiple transmitters you can create a true multiroom system with the ability to manage audio sources and volumes independently.
