Wireless handmic operating in UHF band. Both the microphone and the receiving base are endowed with display for the operating frequency control and battery charge level.

The receiving base is powered by an ordinary USB socket (cable and power adaptor included). Thanks to this peculiarity it can be connected to amplified speakers, mixers, power banks, notebooks or any device endowed with USB socket. Another exclusive feature is the possibility to change the operating frequency (16 channels available) directly from the microphone, rather than from the base. Thanks to the practical XLR and Jack 6,3 mm sockets it is possible to obtain an easy and professional connection.

| | |
|---------------------|------------------------------------|
| Carrying case | No |
| Sensitivity | - 96dB |
| Frequency response | 30 Hz - 20KHz |
| Receiver dimensions | 175 x 40 x 120mm |
