Hi-fi headphones for listening to TV or music. It consists of a transmitter dock to be connected to the audio source via a 3.5mm jack or Toslink optical connector, and a receiver headset with acoustically insulated earpads, extremely comfortable to wear.

By placing the headset on the dock this will automatically recharge it.

The headset can operate at a distance of 20 meters from the dock giving you the possibility to move freely around your home. It has 2 exclusive functions: a key activates a microphone that picks up ambient noise, so that you can hear a person speaking without having to remove the headphones. The second function is the separate volume level adjustment on the right or left earpad, useful for people who have different hearing abilities in the two ears.

The last peculiarity is the audio equalization that can be set on 3 levels.

The dock is powered by a transformer included in the package, but can be also connected directly to the USB socket of the TV to turn on and off automatically. It operates with 2.4 Ghz frequency and is equipped with both 3.5mm and optical inputs.

Transmission method	2.4 Ghz wireless system
Ear pads	Big earpads
Speaker dimension	40 mm
Kind of pads	You can folder headphone for easy transportation
Adjustable volume	Yes
Frequency response	20Hz - 20 KHz
Autonomy	12 hours
Color	Black
Weight	1,4
Product dimensions	185 x 250 x 120 mm
Power supply	Battery only
