Hi-fi headphones for listening to TV or music. It consists of a transmitter dock to be connected to the audio source via a 3.5mm jack or Toslink optical connector, and a receiver headset with acoustically insulated earpads, extremely comfortable to wear.

By placing the headset on the dock this will automatically

recharge it.

The headset can operate at a distance of 20 meters from the dock giving you the possibility to move freely around your home. It has 2 exclusive functions: a key activates a microphone that picks up ambient noise, so that you can hear a person speaking without having to remove the headphones. The second function is the separate volume level adjustment on the right or left earpad, useful for people who have different hearing abilities in the two ears.

The last peculiarity is the audio equalization that can be

set on 3 levels.

The dock is powered by a transformer included in the mackage, but can be also commeded directly to the USB socket of the TV to turn on and off automatically. It operates with 2.4 Ghz frequency and is equipped with both softmand optical inputs. 395 Ampleand optical inputs.

Kind of pads	You can folder headphone for easy transportation
